*Allowable Subject Matter*

This communication is in response to applicant's amendment which is filed March 23, 2006.

Applicant's argument with respect to the pending claims 1-23, filed March 23, 2006, are persuasive. Therefore the examiner has withdrawn the rejections.

Claims 1-23 are allowed.

Referring to Claim 1, the following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest a frequency hopping device which hops a frequency of a subcarrier wave according to a frequency hopping pattern representing a unit data as a first portion of an information signal, and thereby modifies the subcarrier wave.

Referring to Claims 21-22, the following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest an information obtaining device which obtains, from said at least one frame data obtained by the frame-data obtaining device and the frequency hopping pattern recognized by the frequency hopping pattern recognizer, identification information usable to identify the transponder, and transmission information transmitted with the identification information from the transponder to the interrogator..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shida et al. (US# 6,014,406) disclose a frequency-hopped wireless communication system and mobile wireless terminal.
